

ADIT SHAH

Raleigh, NC ♦ 984-379-5585 ♦ ashah45@ncsu.edu ♦ <https://linkedin.com/in/shah-adit0404> ♦ <https://adit-2d-portfolio.vercel.app> ♦ [Google Scholar](#)

EDUCATION

North Carolina State University

MS in Computer Science

Relevant Coursework: Design and Analysis of Algorithms; Software Engineering; Cloud Computing; Neural Networks & Deep Learning

Pandit Deendayal Energy University (Formerly Pandit Deendayal Petroleum University)

B.Tech in Computer Science & Engineering

Anticipated May 2027

GPA: 3.80 / 4.00

Aug 2021 – May 2025

CGPA: 9.39 / 10.00

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, C, TypeScript, JavaScript, SQL

Software Engineering: Data structures & algorithms, object-oriented programming, distributed systems, large-scale system design, REST APIs, automated testing, CI/CD, Linux/Unix

Data / AI: PyTorch, TensorFlow, Reinforcement Learning, LLM applications (RAG, LangChain, LangGraph), Pandas, NumPy, Neo4j, MongoDB, MySQL, Snowflake

AI Productivity Tools: Gemini, Cursor, GitHub Copilot, Claude Code

Cloud & Distributed Systems: Distributed Computing, AWS, Azure, Docker, Kubernetes, Terraform, PostgreSQL/TimescaleDB, Redis, CI/CD, Git, Jira, Vercel, Agile/SDLC

EXPERIENCE

Full-Stack Developer Intern (On-Campus)

Precision Sustainable Agriculture, NC State University

Jun 2026 – Present

Raleigh, NC

- Built and delivered a **React** analytics platform exposing **15,000+** research records to **40+** users through **7 REST API endpoints**, live filters, metrics, and dashboards.
- Standardized centralized theming and shared UI components, reducing duplicate code by **30%**; strengthened data validation, decreasing input errors by **25%**.

Founding AI Engineer Intern

SilverKey Inc.

Jun 2026 – Aug 2026

Remote

- Designed and shipped the startup's first production **SkySlope API** and **PostgreSQL** pipeline with encrypted credential storage, automating ingestion of **2,500+ monthly records**.
- Developed **3** transaction drop-off and agent-risk models with **85%+ accuracy**; delivered a tenant-scoped natural-language-to-SQL service supporting **15+ beta agencies**.

Software Developer Intern

Mindlink Infotech Pvt Ltd

Dec 2024 – May 2025

Ahmedabad, India

- Built **JavaScript**, **AL**, and **SAP HANA** POS dashboards that reduced latency from **10 seconds to under 2 seconds**.
- Delivered **Business Central** import/export modules that improved data-handling efficiency by **25%**.

Software Engineer Intern

True Digital Solutions India Pvt Ltd

May 2024 – Jul 2024

Hyderabad, India

- Developed a **React** and **Node.js** application that processed and visualized real-time IoT telemetry with **<1s latency**, scaling the client-server architecture to **130+ concurrent users**.

PROJECTS

AEQUITAS (FastAPI, Next.js, C++20, LangGraph, WebSockets). [<https://aequitas-platform.vercel.app/>]

- Engineered an end-to-end quantitative research platform ingesting live market data for **500+** equities to power a **4-node LangGraph** autonomous pipeline, generating self-critiqued trading strategies in **<5 seconds**.
- Deployed **14** institutional models (Monte Carlo VaR/CVaR, Black-Scholes Greeks, Kalman-filtered pairs trading) alongside a **WebSocket** price-streaming engine processing **5,000+** ticks/sec with **99.9%** availability.

WolfTrace (Next.js, FastAPI, Neo4j, Gemini API, TwelveLabs).

- Spearheaded a multi-agent platform securing **2nd Place** at **HackNCState** (**350+** participants) by mapping complex evidence via a **Neo4j** graph database to automate confidence scoring and cut manual review time by **40%**.
- Integrated the **TwelveLabs** video forensics API to verify evidence authenticity with a continuous processing latency of **<3s**.

WolfVest (LangChain, LangGraph, Gemini API, Next.js, FastAPI, Snowflake).

- Designed an AI onboarding system (**Best Use of Snowflake API** among **450+** developers) leveraging **LangGraph** and **LangChain** to achieve **99%** state-management consistency across multi-step conversational flows.
- Automated financial form parsing through **OCR** document scanning, validating inputs and reducing manual data entry time by **80%**.
